

On behalf of Alberta Environment & Protected Areas

Draft flood study public engagement - Siksika Bow River flood study.

- The provincial government has released draft flood maps meant to improve public safety, support emergency management, and help build safer and more resilient communities over the long term. Share your thoughts on the draft flood maps by going to <https://www.alberta.ca/siksika-bow-river-flood-study-engagement> by February 12, 2024.
- Engagement opportunities are open for Albertans to provide feedback on new draft flood maps. Feedback will help ensure this work is technically sound. Share your thoughts on the draft flood maps by going to <https://www.alberta.ca/siksika-bow-river-flood-study-engagement> by February 12, 2024.
- New draft flood maps are available for our community and many communities across Alberta. You do not need to be an engineer or flood expert to view or provide feedback. The provincial government will carefully consider all feedback received and will revise the draft flood maps to address technical errors, as appropriate. Share your thoughts on the draft flood maps by going to <https://www.alberta.ca/siksika-bow-river-flood-study-engagement> by February 12, 2024.

For any media that are interesting in sharing the opportunity, please encourage them to contact Jason Penner, at jason.penner@gov.ab.ca or 780-641-8992. For any other comments or questions, please encourage your stakeholders or the public to contact us at epa.flood@gov.ab.ca.
